Instruments (all mono-lingual in Persian/Farsi):

- 1) Long forms of CDI:WG, CDI:WS are psychometrically validated. The paper has been published in Persian (Kazemi et al., 2008; Ghanbari, Kazemi, Nakhshab, 2014; Saleh, Kazemi, Shirazi, 2014).

The second improved version of the forms have been recruited in a large normalizing study (2017) and the complete report is being prepared.

- 2) Short forms of CDI:WG, CDI:WS and CDI-III are under developing in the same normalizing study (2017).

A primary version of the instruments are available by contacting Dr. Yalda Kazemi. The final version of the forms are still being studying to provide the normal range of scores along with the manual.
