Instrument developed: CDI Words only, long and short form

Age range intended: between 8 to 30 months

Year completed: Website designed January, 2017. Still collecting data for the standardisation of the Arabic CDI.

Standardisation is mainly done online through a dedicated website, with a proportion of parents filling both a paper version and the online version for validation. Data collection is ongoing (norms not available yet). Two groups of English/Arabic bilinguals are also included, in the UK and the UAE.

The Arabic CDI is available at: www.psy.plymouth.ac.uk/arabiccdi
